

ULTRA-SILENT. ISN'T THAT JUST COOL?

Custom-designed solutions for safe storage and distinguished enjoyment of wine at sea.

SILENT EFFICIENCY

INNOVATIONS IN MARITIME COOLING TECHNOLOGY

Since it is integrated into the onboard chilled water circuit, this novel wine cooler uses the resources available on board in a comfortable as well as efficient way. As a result, a variable temperature range from 2 to 12 degrees centigrade is available for the storage of premium wines. As the refrigerating unit discharges heat into the air conditioning coolant, the wine cooler is energy-efficient, extremely silent, and emits no heat to the environment.

CUSTOMIZED CONFIGURATION

À LA CARTE SPECIFICATIONS

Design and specifications of this wine cooler are subject to variable configurations. Its dimensions are meticulously adapted to the available space on board allowing for a very wide range of customer wishes to be fulfilled smoothly. In terms of materials, there is a choice of many types of wood including for example premium Makassar ebony as well as bright cherrywood. Upon request, woods can be finished in any colour. The subtle lighting of the interior is achieved by multi-colour LEDs which can be programmed according to individual preferences.

SEAFASTENING

SEAFASTENING FOR SAFE STORAGE OF OVER 100 BOTTLES

To ensure that your inventory of premium wines not only stays cool at sea but also remains safely fastened even in rough sea, the wine cooler developed by Gehr Interior in cooperation with the most renowned manufacturer of yacht kitchens has been equipped with intelligent fastening systems.

① Precisely fitted inlays secure neck and body of any bottle, regardless shape and size.

② Drawers and doors are protected against accidental opening and can be unlatched by slightly pushing, pulling, or by means of a number code.

③ Velvet-upholstered retainers will secure individual bottles.

④ In extreme weather conditions, the bottles may be additionally fastened crossways with special strapping devices.

INTRIGUING PRESENTATION

3D WINE LIST IN A SHOWCASE

A large, prominently positioned display case provides an intriguing presentation of selected wines as well as champagnes. It enables exhibiting and showcasing of individual bottles in an upright position e.g. for wine tasting purposes (including Magnum size or larger).

An additional type of presentation space is achieved by a special tilting mechanism ①.

The front row bottles may be hinged upwards, latching in a position tilted to the rear by about 35° in order to be most suitably showcased.

FOSTERING ESTABLISHED QUALITY – WITH A KEEN SENSE OF INNOVATION

In 1913, my great-grandfather Nikolaus Gehr opened up a small carpenter's shop. Today, as a fifth-generation family business with roughly 60 employees we can look back at over 100 years of tradition. The name Gehr is synonymous with high-end and exceptional interior furnishings for luxury yachts, business jets, and cruise ships worldwide.

A highly skilled team made up of engineers, technicians, and architects develops solutions

for interior installations catering to the preferences of our exclusive clientele. We manufacture precisely fitting interiors and install them on board in due time. Together, we will find intelligent and innovative responses to even the most demanding requirements, thus ensuring that luxury and functionality perfectly complement each other even out on the high seas.
